

GHK-CU FACE SERUM

Your skin's natural repair signal. In a bottle.

GHK-Cu is a copper peptide your body already makes. It tells skin to rebuild collagen, smooth fine lines, and restore the healthy glow you thought was gone. We put it in a prescription serum.

We'll review your skin goals and determine if GHK-Cu serum belongs in your plan.

01 IS THIS YOU

Is this you?

Fine lines and wrinkles that seem to appear overnight

Loss of firmness — skin doesn't bounce back like it used to

Dull, tired-looking skin that no moisturizer seems to fix

Sun damage, uneven texture, or rough patches

Redness or sensitivity that flares up easily

You've tried every serum and nothing really works

02 HOW IT WORKS

A peptide your body already knows. Now in a serum.

GHK-Cu is made of three amino acids — glycine, histidine, and lysine — attached to a copper molecule. When you're young, you have plenty of it. It helps wounds heal fast and keeps skin firm. But by 60, your levels drop by about 60%. This serum puts that repair signal back where it belongs.

07 COMMON QUESTIONS

Questions about GHK-Cu serum

01 Will the serum stain my skin blue?

02	Can I use it with retinol or other actives?	+
03	Is this the same as the GHK-Cu injections?	+
04	How long does one bottle last?	+
05	How much does it cost?	+
06	Do I need a prescription?	+
07	What if I have sensitive skin?	+
