

YOUR IV THERAPY GUIDE

# The Range IV

Everything you need to know about your custom IV infusion — what's in it, how it works, and what to expect.

**CUSTOM:** 5 vitamins & minerals

**DURATION:** 45–90 minutes

## 01 THE BASICS

### Why IV therapy?

IV therapy delivers vitamins, minerals, and amino acids directly into your bloodstream — bypassing your digestive system for 100% absorption.

Oral supplements lose 20–80% to digestion. IV puts everything directly where your cells can use it. The result is faster, more noticeable benefits — often within hours of your first session.

## 02 YOUR CUSTOM IV

### Choose 5 vitamins & minerals

Our nurses review your needs before every infusion. Additional add-ons available at

\$35 each.

|                                                                               |                                                                           |
|-------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| <b>Vitamin C</b><br>Immune support, powerful antioxidant, collagen production | <b>B-Complex</b><br>Energy production, metabolism, nervous system support |
| <b>B12</b><br>Energy, mood, nerve function, red blood cell production         | <b>Magnesium</b><br>Muscle recovery, sleep quality, stress reduction      |
| <b>Zinc</b><br>Immune function, skin health, wound healing                    | <b>Glutathione</b><br>Master antioxidant, detoxification, anti-aging      |
| <b>Amino Acids</b><br>Muscle repair, recovery, protein synthesis              | <b>L-Carnitine</b><br>Fat metabolism, cellular energy production          |
| <b>NAC</b><br>Liver support, antioxidant, respiratory health                  | <b>Calcium</b><br>Bone health, muscle function, nerve signaling           |
| <b>Biotin</b><br>Hair, skin, and nail health                                  | <b>Vitamin D3</b><br>Immune function, mood, bone health                   |

03 PRICING

Simple, transparent pricing

THE RANGE IV

\$225

5 vitamins and minerals included. Additional add-ons:  
+\$35 each. 45–90 minute session.

### Why IV Instead of Oral?

100% absorption vs 20–80% with pills. Rapid results — feel effects within hours.  
Higher therapeutic doses possible. Customized to your specific needs.

## 04 INSTRUCTIONS

# What to know before your session

1

### HYDRATE

Drink plenty of water before your session. Being well-hydrated makes IV placement easier and improves absorption.

2

### WEAR COMFORTABLE CLOTHING

Choose clothing with easy arm access. Short sleeves or sleeves that roll up easily work best.

3

### RELAX

Sessions are 45–90 minutes. You can relax, read, work on your laptop, or watch something. We have comfortable chairs and a calm environment.

4

### AFTER YOUR SESSION

Continue hydrating. You can return to normal activities immediately. Many patients feel the effects within hours.

## What to expect

Many patients feel the effects within hours. For ongoing wellness, consistent sessions provide cumulative benefit.

### DURING SESSION

Mild warmth or coolness at the IV site is normal. Some notice a vitamin taste — this is expected and harmless.

### SAME DAY

Energy, hydration, and immune benefits are often immediate. Many patients feel noticeably better within hours.

### WEEKLY SESSIONS

Consistent weekly or bi-weekly sessions provide cumulative benefits for energy, recovery, and immune support.

### ONGOING

Regular IV therapy keeps your nutrient levels optimized. Your body has what it needs to perform and recover at its best.

## Important safety

# information

## TELL YOUR NURSE IF YOU HAVE:

- ✕ Any known allergies
- ✕ Kidney disease or kidney problems
- ✕ Heart conditions
- ✕ Are pregnant or breastfeeding
- ✕ Are taking blood thinners

## POSSIBLE SIDE EFFECTS:

- Coolness or warmth at IV site
- Slight bruising at insertion point
- Temporary vitamin taste in mouth
- Mild flushing (magnesium)
- Allergic reactions are rare

IV therapy is safe when administered by licensed providers. Inform your nurse of any discomfort during the session.

---

**Important:** Individual results vary. These treatments are not FDA-approved to diagnose, treat, cure, or prevent any disease.
