

YOUR PEPTIDE PROTOCOL GUIDE

5-Amino-1MQ / SLUPP

The oral metabolic optimization blend — two targeted compounds that support fat metabolism, cellular energy, and metabolic function without injections.

DOSE: 50mg / 1mg daily tablet

01 THE BASICS

What is 5-Amino-1MQ / SLUPP?

An oral peptide tablet combining two compounds that target metabolic function at the cellular level.

5-Amino-1MQ inhibits NNMT — an enzyme linked to fat storage and metabolic slowdown. By blocking NNMT, it helps restore healthy metabolic activity and supports the body's natural fat-burning pathways. SLUPP works alongside it to support cellular energy production. No injections required — just one tablet per day.

02 HOW IT WORKS

What 5-Amino-1MQ / SLUPP does

Four key mechanisms that make this oral blend a powerful tool for

metabolic optimization.

NNMT Inhibition

- ✓ Blocks the enzyme linked to fat cell expansion
- ✓ Targets metabolic slowdown at the source
- ✓ Supports restoration of healthy metabolic activity

Metabolic Boost

- ✓ Supports healthy cellular energy production
- ✓ Promotes optimal NAD+ levels
- ✓ Enhances overall metabolic efficiency

Fat Metabolism

- ✓ Promotes the body's natural fat-burning pathways
- ✓ Supports healthy body composition
- ✓ Works synergistically with diet and exercise

Easy Protocol

- ✓ Oral tablet — no injections required
- ✓ No mixing or reconstitution needed
- ✓ No refrigeration — store at room temperature

03 YOUR PROTOCOL

How to use 5-Amino-1MQ / SLUPP

Your provider has prescribed a protocol tailored to your goals. Here are the key

details to keep in mind.

Dosing

1 tablet daily, taken in the morning with or without food. Consistency is key — same time every day for best results.

Duration

30 days per cycle. Your provider may recommend additional cycles based on your response and metabolic goals.

Delivery

Pick up at the clinic or have your tablets shipped directly to you. No cold storage or special handling required.

Storage

Store at room temperature in a cool, dry place. No refrigeration needed. Keep out of direct sunlight and away from moisture.

Pro Tip

Set a daily morning alarm to stay consistent. Taking your tablet at the same time each day keeps levels steady and maximizes metabolic support.

04 TIMELINE

What to expect

Everyone responds differently, but here's what patients typically experience during a 5-Amino-1MQ / SLUPP protocol.

WEEK 1-2

Your body begins adapting to the metabolic shift. Some patients notice improved energy levels and reduced cravings. Subtle changes in how your body processes fuel.

WEEK 3-4

Metabolic benefits become more noticeable. Patients often report improved body composition, sustained energy throughout the day, and better response to diet and exercise.

WEEK 5+

Compounding results with continued use. Many patients see meaningful changes in body composition and metabolic markers. Your provider may recommend additional cycles for sustained progress.

05 SAFETY

Reported side effects

This is an oral protocol, so most reported effects are digestive or timing related.

- ✓ Mild nausea or stomach upset, more likely without food
- ✓ Reduced appetite
- ✓ Headache
- ✓ Trouble falling asleep if taken late in the day
- ✓ Energy fluctuations in the first week

Take it with food and earlier in the day. Contact us if nausea keeps you from eating normally.

06 WHAT WE OFFER

Our services

Based on your goals, your provider may recommend one or more of the following.

Hormone Optimization

Medical Weight Loss

IV Therapy

Peptide Therapy

Vitamin Injections

NAD+ Therapy

Hyperbaric Oxygen Therapy

Red Light Therapy

PRP Therapy

6-Week Cellular Reset

Comprehensive program combining multiple therapies for full cellular energy restoration.

Important: Peptides are classified for research purposes only and are not FDA-approved to diagnose, treat, cure, or prevent any disease. Individual results vary based on health status, dosage, and consistency. Do not adjust your protocol without consulting your provider.
